DETAILED ACTION

1. This action is in response to the communication filed 3/19/2007.

Allowable Subject Matter

2. Claims 1-22 allowed.

3. The following is an examiner's statement of reasons for allowance:

As to Claim 1,

The primary reason for the allowance of claim 1 is the inclusion of making multiple computations of spatial coordinates of the object based on the signals received at the different frequencies, and ascertaining whether the energy fields have been perturbed by an article in the vicinity of the object by testing a convergence of the computations. It is these features found in the claim, as they are claimed in the combination that has not been found, taught or suggested by the prior art of record, which makes this claim allowable over the prior art.

As to Claim 12,

The primary reason for the allowance of claim 12 is the inclusion of a system controller adapted to make multiple computations of spatial coordinates of the object based on the

signals generated at the different frequencies and to ascertain whether the energy fields have been perturbed by an article in the vicinity of the object by testing a convergence of the computations. It is these features found in the claim, as they are claimed in the combination that has not been found, taught or suggested by the prior art of record, which makes this claim allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
